Honorable Commissioner:

In response to the Office Action dated July 16, 2002, the period of response for which is hereby extended by three month to January 16, 2003, please amend the above-identified application as follows:

In the Specification:

Please replace the paragraph starting on page 4, line 16, with the following paragraph:

--While the new MALDI techniques opened the field of biomolecular mass spectrometry, the mass spectrometric analysis of complex biological materials was not possible because of matrix overloading. Recently, Hutchens et al. (Hutchens, T.W. and Yip, T., Rapid Communications in Mass Spectrometry, vol 7, 1993, pp. 576-580.) demonstrated the utilization of affinity capture methods to quasi-purify proteins in a specimen prior to MALDI mass spectrometry.
